

Note: This product is distributed on a 'try-before-you-buy' basis. All features described in this documentation are enabled. The unregistered version will output flashes with adding watermarks.

About A-PDF To Flash

If you want to publish a printed magazine or journal online, you are either already using or thinking about using a PDF to Flash software for digitizing your publication.

As we all known, Flash content may be displayed on various computer systems and devices, using Adobe Flash Player, which is available free of charge for common web browsers, some mobile phones and a few other electronic devices.

Once converted to flash, anyone can easily view a PDF document using a web browser as more than 98% of all browsers have the Adobe flash plug-in already installed. So, you are not required to install any special software or tell your audience to do the same.

A-PDF To Flash is such powerful and lightning-fast converter software to enable you to convert all PDF content to animated flash pages. The easy-to-use format transform tool can process your PDF files in a few seconds, which also allows you to record live audio as background sound, add active links or files as attachments, apply multiple different transitions between slides.

With using A-PDF To Flash, you can become a Flash Pro even without reading manual file. Just add PDF file, choose transition effect, embed background sound, and then click "Publish" to output the edited pages into animated flash file at last.

Then, you can upload the created HTML Flash file online, and let your website visitors to view your PDF documents in a popular and professional way. Or send the integrated EXE or ZIP file to someone else to let them enjoy your animated flash file.

Detail features include:

- Convert PDF files to flash movies.
- Provides multiple kinds of transition effects.
- Define transition time and retain time manually.
- Record audio or add MP3 file directly as background sound for each slide.
- Enable edit on added pages, such as text, graphic, highlight, etc.
- Add description for slides.
- Add attachment to output flash file.
- Define logo for adding to flash.
- Allow preview flash effect before outputting.
- Save project for later uses.
- Publish in three formats: HTML, EXE, ZIP.

HTML allows you to upload to a website to be viewed online.

EXE and Zip allow you to send to your user by email to be viewed on their computer.

- Provide embed code after creating flash.
